

Plinth elements for plastic lifting sliding doors

Product description

Frinorm plinth elements for plastic lifting sliding doors for floors are especially suited for a wide range of demands, such as thermal protection and a high load capacity. They are available with a plywood board IW67, covered with unplasticised PVC. Intensely expanded rigid polystyrene foam (EPS perimeter), 30 kg/m³, is used for thermal insulation. All possible CNC edge profile work is performed on all sides according to your profile specifications

Range and design

| Type | Cover panel and surface | Thermal insulation | U-values |
|------------|--|---|--|
| PVC, white | Both sides 32 mm, plywood board IW67, covered with unplasticised PVC, 1.5 mm | Intensely expanded rigid polystyrene foam (EPS perimeter), 30 kg/m ³ | Thermal transmittance coefficients up to 0.1 W/m ² K (For U-values, see table on technical data sheet) |

Thicknesses

Thicknesses from 100 mm to 240 mm can be produced
For thicknesses below 100 mm, see plinth elements for plastic balcony doors

Formats

All formats from 500 × 95 mm up to 2510 × 1294 mm can be manufactured
Plinth elements that are longer than 2510 mm are shaped with grooves for dovetail joints

CNC edge milling

All possible CNC edge profile work is performed on all sides according to your profile specifications.

Consultation
